*a brief history of biological distance analysis* endnotes. 1. the term *biological distance analysis* has been used in population biology (Balakrishan and Sanghvi, 1968, Morton, 1975) and anthropology (Constandse-Westermann, 1972, Laughlin, 1960) since the early 1960s and 1970s. Origins of the abbreviated *biodistance* are not as clear, but the earliest published example we found was Brown (1977).

*biological distance analysis, cranial morphoscopic traits* Forensic anthropology and morphoscopic traits are only rarely considered in the biological distance analysis literature. When they are employed, their treatment is often theoretical (and population-based) so these studies are of little use to practicing forensic anthropologists.
