As a result of global dynamics—the increasing interconnection of people and places—innovations in global environmental governance have altered the role of cities in shaping the future of the planet.

Cities, networks, and global environmental governance as a result of global dynamics—the increasing interconnection of people and places—innovations in global environmental governance have altered the role of cities in shaping the future of the planet. This book is a timely study of the importance of these social transformations in our increasingly global and increasingly urban world.

Cities networks and global environmental governance cities are increasingly central to the global governance of climate change, and much of their activity takes place within city networks operating at national, regional, and global scales.

Cities, networks, and global environmental governance this tied in the hi! Seoul marketing campaign (soul of Asia) of 2009-2010 that aimed at putting Seoul on the map as a city that can compete with other global cities all over the world. This global city framing also serves the message that city networks constitute new geographies of power that are of increasing
importance for global governance. Major cities concentrate key economic, political, and cultural actors that shape our future and are therefore conceptualized as strategic places.

**transnational networks and global environmental governance** through connecting cities from diverse background across the globe, city-networks emerged as an increasingly influential actor under the larger framework of global governance.

**transnational networks and global environmental governance** the past decade has witnessed a growing interest among scholars of international relations, and global environmental governance in particular, in the role of transnational networks within the international arena (Risse-Kappen, 1995; Lipschutz, 1996; Wapner, 1996; Keck and Sikkink, 1998; Risse, Ropp, and Sikkink, 1999; Newell, 2000). While the existence and potential significance of such networks has been documented, many questions concerning, for example, the nature of governance conducted

**cities, networks, and global environmental governance** cities, networks, and global environmental governance: spaces of innovation, places of leadership. [Sofie Bouteligier] – "As a result of global dynamics—the increasing interconnection of people and places—innovations in global environmental governance have altered the role of cities in shaping the future of the planet.

**city-networks, global climate governance, and the road to** transnational city-networks are mobilizing cities in the global fight against climate change. &bull; City-networks help build capacity to measure, report, verify emissions reductions. &bull; There is a need for research into the ability of city-networks to contribute to a 1.5 &deg;C global target. &bull;

**between local innovation and global impact: cities** cities, and city-networks such as the C40 Climate Leadership Group, represent important sources of innovation in the broader system of global climate governance: they challenge prevailing norms regarding who should govern climate change, and how coordinated governance responses can be generated.
**Global Environmental Governance: A Reform Agenda**  
Global environmental governance (GEG) is the sum of organizations, policy instruments, financing mechanisms, rules, procedures and norms that regulate the processes of global environmental protection. Since environmental issues entered the international agenda in the early 1970s, global environmental politics and policies have been developing.

**Global Cities and Transnational Climate Change Networks**  
Taedong Lee is an assistant professor in the Department of Asian and International Studies at City University of Hong Kong. Lee has worked on sub-national environmental governance with a variety of topics and methods. He developed two book projects, Translocal Relations and Climate Change; and Climate Policies: A Guide for Local Government. His articles have appeared in journals including Transnationalization of Climate Adaptation by Regional Transnational Networks and Global Environmental Governance: The Cities for Climate Protection Program. International Studies Quarterly, 48 (2), 471.

**Cities and Climate Change: Urban Sustainability and Global Cities and Climate Change**  

**Cities for Climate Protection Program - Wikipedia**  
The Cities for Climate Protection Program (CCP) is one of three major global transnational municipal networks aimed at reducing urban greenhouse gas emissions. Established in 1990 by the International Union of Local Authorities and the United Nations Environment Programme, one of the largest global transnational networks, the International Council for Local Environment Initiatives (ICLEI), presented a framework to represent local government environmental concerns internationally.

**Environmental Governance by Transnational Municipal**  
Global environmental governance has developed a multi-layer of government from the global to the local. Transnational municipal networks (TMs) are a newly emerging form of organization within global environmental governance. The TMs are an institutional mechanism to enhance how local governments address environmental problems.

**Reconfiguring Environmental Governance: Towards a Politics**  
In making this argument, the paper provides an overview of contemporary configurations of global environmental governance, and seeks to illustrate by reference to one transnational municipal network, the Cities for Climate Protection Programme, how governing the environment involves both political processes of scaling and rescaling the objects.
beyond the network effect: towards an alternative abstract. global organizations providing network relations for cities are bourgeoning. organizations such as metropolis, un-habitat, iceli &ndash; local governments for sustainability, the global compact cities programme, and the c40, as well as city-to-city arrangements, have become increasingly important to managing urban networking and global urban governance.

the new climate leaders? | review of international studies 9 curtis, &lsquo;global cities and the transformation of the international system&rsquo;, p. 1939. i have illustrated the analytical advantages of ant for integrating cities in global governance more at length in acuto, michele, &lsquo;putting ants in the mille-feuille &rsquo;, city, 15: 4 (2011), pp. 552 &ndash;62.

multiâ€•level governance and global climate change in east cities and provinces are initiating their own climate action plans, positioning themselves as environmental model cities, and joining local, national, and international networks for climate change. this article examines urban and prefectural climate policies in china, japan, and south korea within a multilevel governance framework.
