Investigating Adolescent Health Communication A Corpus Linguistics Approach Kevin Harvey

Investigating Adolescent Health Communication A Corpus
Linguistics Approach Kevin Harvey

"investigating adolescent health communication: a corpus" does indeed push back boundaries: in applied linguistic research practice, in methodology, in its rich interdisciplinarity and in its potential for impact on a key and hitherto relatively
neglected area of social life. It is a model of applied linguistics in action and it brings to the arena a use of corpus linguistics which is distinctive, richly nuanced, and exemplary.

investigating adolescent health communication: a corpus  a comprehensive corpus analysis of adolescent health communication is long overdue “and this book
provides it. we know comparatively little about the language adolescents use to articulate their health concerns, and discourse analysis of their choices can shed light on their attitudes towards and beliefs about health and illness.

adolescence is a time of major transition, however, health care services in the United States today are not designed to help young people develop healthy routines, behaviors, and relationships that they can carry into their adult lives. While most adolescents at this stage of life are thriving, many of them

investigating equalisation of health inequalities during introduction. Socioeconomic status (SES) is a strong predictor of health. To be born and grow up in poverty shortens life expectancy and increases the
risk of illness and injury, but health inequalities also exist at all levels of income. 2 although there is evidence that social health gradients persist throughout the life course, 3 it has been suggested that they may reduce during adolescents' perceptions of canadian cigarette this study investigates gain-framed and
loss-framed messages on graphic cigarette warning labels and their effects on adolescents' smoking-related attitudes and behaviors.

canadian cigarette warning labels emphasizing health consequences of smoking (loss-framed) were digitally manipulated into gain-framed versions. high school students (n = 210) completed a questionnaire measuring attitudes
barriers to parent-child communication on sexual and reproductive health, communication, barriers, East Africa.

Introduction

Adolescent sexual and reproductive health has emerged as an area of key concern in the world.

According to UNFPA (2011), one person in five worldwide is an adolescent, which
translates to a global adolescent

parental influences on adolescent decision making and this article reviews the literature in the area of parental and maternal influences on contraceptive decision making, thus determining future directions of research and potential interventions. A review of published literature
using pubmed, cinahl, infotrack, science and technology, and medline spanning 1980-2007 was used to gather information. results from 35 research studies and 15 scholarly a review of studies of parent-child communication about parent-child sexuality communication has been identified as a protective
factor for adolescent sexual and reproductive health, including HIV infection. The available literature on this topic in sub-Saharan Africa is increasing; however, a systematic review of studies has not been conducted. This article reviews the literature in the area of parental or caregiver and child communication about what we know about the
